The FALCON utilizes complete SHIMANO DEORE mountain bike transmission system and boasts professional road bike alloy CNC 52/42/30T large gear plate. This combination allows for the ultimate performance of torque and power under any road conditions. The FALCON combines the essence of road bikes and mountain bikes. Under normal road conditions, the FALCON offers front and back comfort suspension systems. For hill or speed challenges, the line controlled front suspension fork and back suspension system will come into play. This combination allows the rider to handle even the toughest conditions. Coupled with superior front-back dual suspension system and large road bike gear plates, the FALCON's rotation speed is overwhelmingly fluid, taking full advantage of every cycle. The SHIMANO DEORE transmission system allows the rider effortless riding comfort during hill climbs. Compared to traditional systems, the SHIMANO DEORE shines with superior riding pleasure for any hill climb or road race challenge.

The brand new model SRS series Falcon is a 20" 27speed folding bike that embodies superior torque and speed. It possesses the shock absorbing comfort of a mountain bike and the multiple gear ratio of a road bike. It is a hybrid foldable with sporty and youthful styling.
